Olds Garage Totally Destroyed by Fire

Olds was again visited with fire Tuesday morning when the garage occupied by C & B Motors was totally destroyed.

The building which was valued at \$3,000 was owned by Mr. Sam Staples who resides in Calgary. It is reported that the insurance lapsed a few days before the fire.

The stock of repairs and equipment together with two trucks and two cars were destroyed, but three other cars and the books were saved, the loss being about \$14,000. Messrs. E. C. Braden and Max Chaffee were the owners and the loss was partly covered by insurance.

A mechanic who sleeps on the premises managed to get out with his life, but most of his personal belongings were destroyed.

The records of the Agricultural Society were kept at the garage and fortunately were saved, as the fair took place the next day.

Govt. Financially Backs Wheat Pools

A guarantee against panic conditions, an initial payment of 35 cents per bushel to grain growers and operation of elevators of the western wheat pools and terminals the same as privately owned enterprises are operated, were announced by the Prime Minister last week.

The statement reflects the outcome of the conferences between the representatives of the Provincial Governments, the Wheat Pool and the Banks, along with John I. MacFarland, director of the selling organization. It is understood that Mr. MacFarland's services will be available at least until the season is over.

Those who wish to market their grain on the pool principle as distinguished from the ordinary trading may do so.

The Prime Minister's statement is as follows: "The wheat pools of the three western provinces which own nearly 1,000 country elevators as well as terminals at Vancouver and Port William, will operate this year in the same way as privately owned enterprises. They will have ample working capital and the provinces will not be called upon to guarantee their operations."

"The Dominion Government will take whatever action may be necessary to insure the orderly marketing of the crop of the year. Panic conditions will not be permitted to control the prices obtaining for this year's western grain crop."

It should be noted that the bonus of 5 cents a bushel to be paid by the Federal Government is extra, above the 35 cents initial pool payment.

Students Visit Former Teacher

A number of the Didsbury High School students paid a visit to their former teacher, Mrs. John Clarke at her home west of town Tuesday.

The visit was developed into an annual affair and all the students who attend appear to enjoy the event greatly. The evening was spent in games and lunch was served.

Those who attended were: Joyce Moyle, Dorothy Ranton, Dorothy Hugot, Nelda Hugot, Annie Currie, Mae Royds, Mollie Pearson, Ethel Krebs and Margaret Geiger. Frank Moyle, George Hawkes, Ormond Phillipson, Charles Geiger, Carlton Leeson, Reid Clarke and Tom Royds.

Music Examination.

At the recent examination in music held in Didsbury by the Associated Board of the Royal Academy of Music and the Royal College of Music, London, England, all the pupils entered for Victoria Thompson, L.R.A.M., M.R.S.T., were successful as follows:

Final:	Janet Adam	Pass
Intermediate:	Evelyn Brooke	Honors
Higher:	Lorna Clarke	Pass
Lower:	Rita Seranton	Honors
Elementary:	Ona Brown	Pass
	Ken Brown	"
	Bessie Finlay	"
	Jean Robertson	"

Morning Service at St. Cyprian's Church, 11 a.m.

Messrs. Cunningham and Honey returned last Wednesday from a trip to the Peace River country. They report that grain cutting has commenced in that district. They did not locate, as hoped, as could not be obtained in the districts they visited, under forty or fifty miles from the railway.

LOCAL & GENERAL

Miss Aloda Hugot left Tuesday to visit friends at Nanton.

Miss W. Moyle, of Winnipeg is visiting at her home here this week.

Mr. J. Hugot motored to Edmonton over the week-end.

Mr. and Mrs. Orville Geiger are visiting the Miller's parents here this week.

Mrs. Walter Miller and little daughter, of Indus, Alberta are visiting Mrs. D. Geiger and other relatives.

Mr. and Mrs. J. Boorman returned this week from their vacation which they spent at Sylvan Lake and Lacanbec.

Rev. A. J. Mitchell, of the United Church will hold services this Sunday at: Olds, 11 a.m. Westerdale, 3 p.m.

Sermon topics for Sunday, Aug. 16th at Zion Evangelical Church: Morning, 10.30, "The Spirit of Christ," Evening, 7.30, "The Call of Levi."

"Men of the Skies," the story of a great spy system brought to you vividly. Intrigue never before revealed. At the Opera House next Thursday. 25 cents to everybody.

Mr. Ormond Phillipson returned Wednesday last from his vacation. While away he visited Vancouver, Victoria, Prince Rupert and other points.

Messrs. Elwood and Howard Evans and Misses Ruth Brubacher, Dorothy Young and Ethel Klunk who have been attending summer school at the University of Alberta, returned home last week-end.

Misses Doris Jones and Aimee Wigley returned to Vulcan last week after spending a two weeks holiday on the farm of W. Wigley at Westerdale.

Jack McCloy and Jim Cathness were out west on a fishing trip on Sunday. They made a good catch, which must be so, as they both tell the same story.

Mr. and Mrs. Ben Robinson, of High Prairie are visiting Mrs. Robinson's mother, Mrs. Seysmith. Mr. Robinson is manager of the Royal Bank at High Prairie.

Messrs. Jim Morris and Clarence Greer returned from the Peace River Black, B.C. Saturday. They both filed on a homestead which was located about fifteen miles from Fort St. John.

Mrs. Tom Stark and son Bill, of Denholm are visiting at the home of her brother, Mr. J. A. McChie. They were accompanied by Mrs. Clifton who stayed over the week end.

ERRATA:

In the list of prizewinners published last week, in the shorthorn class H. W. Waite should have been credited with winning 2nd prize for 1 yr. old bull, purchased bull calf, cow, 2 yrs. or over, purchased bull calf and 3rd prize for 2 yr. old heifer.

SOFTBALL

The Country Clowns re-established their reputation in the tournament held at Olds Wednesday last, when they easily won the three games and brought home the first prize of fifteen dollars.

In their first game they defeated Innisfail girls 15-10 and in the second game they ousted Olds 14-1, while in the final game Bowden girls were forced to accept a 26-6 defeat.

In spite of the damp and chilly weather the girls were in rare form and forfeited their last bat in each of the three games.

Govt. Crop Report.

Rains have occurred in the north, north central and extreme southern part of Alberta during the past week. From Calgary to MacLeod and in the east central part of the province dry weather continues and crops are suffering severely. In the north central area rains were very heavy, totalling three inches of precipitation at some points. This excessive moisture has caused considerable rotting of grain and will tend to delay ripening. Extensive hail damage is reported at a number of points and freezing temperatures were reached at a few points in the Peace River district.

Cutting of wheat is in progress in the southern part of the province and barley cutting has commenced. If favored with dry weather, cutting will be general throughout the province in the next ten or twelve days. No serious damage from insect or plant disease is reported.

Haying in the province has been at a standstill for the past fortnight, owing to the continued wet weather and many fields of sweet clover and other kinds of hay have deteriorated in quality. A period of dry warm weather is urgently needed both for haying and hastening maturity of grain crops.

Pastures outside the dry areas are in excellent condition. Potatoes and other special crops give promise of satisfactory yields.

BASEBALL

Although the Didsbury boys lost the Cup to Irricana with a score of 3-1 at Crossfield Friday night, they put up the best game of ball played this season. Irricana imported the Dodger Lewis battery from Calgary, but even at that, Scotty Lee who pitched for Didsbury would have had the edge on the game, except for unfortunate breaks in the eighth.

Didsbury got their only run in the first inning and shut-out ball was played for both sides up to the eighth. Forrester got to first when Woodcock dropped the ball on the third strike and Wyman failed to connect with the throw to first. Dodger hit a two-bagger, Dodger Lewis made a single and at the end of the inning Irricana had three men home. Except for this inning Didsbury played airtight ball and though they tried hard, Lewis held them scoreless for the rest of the game.

The Evangelical Church is holding a summer school at Sylvan Lake from Tuesday to Saturday of this week, under the direction of Rev. and Mrs. H. J. Wood. The boys and girls were busy Monday gathering their camping equipment and got away early Tuesday morning.

The following girls and boys are attending the school:

Margaret Kordner, Ruby Kercher, Ruth Gabel, Helen Moon, Winnie Hogg, Beth Wrigglesworth, Ruth Fenech, Lila Wrigglesworth, Laura Liesener, Donna Liesener, Dorothy Webster, Goldie Gabel, Raymond Shantz, Lloyd Snyder, Leonard Berscht, Claire Snyder, Stuart Liesener. Mr. and Mrs. Wood, Harold and Leila.

The program for each day will be: Rising Bell, 7.30; Breakfast, 8.30; Study, 9.30 to 11. The afternoon will be spent in hiking, boating, bathing and sports. In the evening there will be a campfire and vesper service.

DIDSBURY, ALBERTA.

Fifty Per Cent. Of Cattle Hides In Canada Last Year Were Damaged By Warble Fly Grubs

Fully half of the 1,300,000 cattle hides taken off last year in Canada showed unmistakable evidence of damage by warble fly grubs and the value of the finished leather produced from these hides was reduced by at least \$700,000. The extent of the additional loss in reduced milk and beef production cannot be determined, but it is probably equal to, or greater than, the direct damage to hides and leather.

According to Dr. W. E. Graham, of the National Research Laboratories, Ottawa, who secured this information from Canadian packers and tanners in connection with the leather research programme on which he is engaged, 15 per cent of all hides taken off in 1930 had open grub holes. Damage is most serious during the first six months of the year,

over a dozen warble fly grubs are found annually in all the cattle. Because the warbles do not fly far they can be controlled locally in comparatively small areas, although it would be considered impossible for a single small farmer to act alone in such a matter.

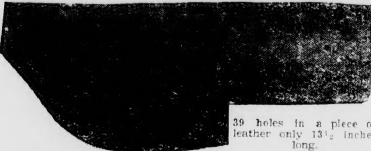

Farmers are recommended to seek advice as to treatment from recognized authorities.

Dr. Graham's report concludes as follows:

"Through buying hides in the fall to avoid open grub holes, tanners encounter considerable loss through interest charges on capital tied up for long periods, a loss which we cannot estimate.

The existence of grub holes in hides is, in addition to monetary losses involved, a potential source of

The holes in this piece of leather were caused by the Larva of the Warble Fly

39 holes in a piece of leather only 12 1/2 inches long.

when some tanners refuse to buy Canadian hides. In April and May 1930, the percentage of hides that were 'grubby' ran as high as 45 or 50 per cent. Dr. Graham states that more grubby hides are found on western range stock than on other cattle and that the percentage is 10 per cent greater on steers than on cows. One tanner gave his opinion that 95 per cent of Canadian hides showed the unsightly signs of present or previous infestations.

The warble fly grub, hatched out from eggs laid on the legs of cattle, work their way through the skin, thence to the gutlet and eventually eat through the animal's back. They leave holes which gradually close but always result in a permanent scar which reduces the quality of the leather.

Hundreds of holes caused by grubs have been counted in a single hide. The area affected is limited to about 10 per cent of the hide, or 4 square feet, but is the best part for the production of leather. Samples of leather made from affected hides submitted to the Research Laboratories have the appearance of having been ridged by gun shot.

Losses from the warble fly have reached such proportions and remedial measures have been developed which are so satisfactory that the tanning industry through the National Research Council's Associate Committee on Leather has urged a concerted and determined effort at eradication. The Dominion Department of Agriculture is taking special action. Dr. Graham's estimate of losses incurred is being made available to this department and the other agencies concerned.

That the problem of eradication is by no means insuperable is indicated by the experience of Dean A. M. Shaw at the farm of the University of Saskatchewan at Saskatoon. For some years regular treatment has been applied, with the result that at present it is stated that probably not

annoyance and ill feeling due to difficulty in arriving at a proper estimate of an allowance for grubs.

"It is felt that under the present system of marketing in Canada the farmer has not come to realize fully the difference in value between 'grubby' and 'clean' hides. All Canadian hides sell for less because of the warble damage. In the British Hide Markets during 1929 a classification for warbled hides was introduced and as a result warbled hides are realizing from one to three cents a pound less than clean hides. Substantial evidence has been received showing that a considerable portion of the difference in value between a warbled and an unwarbled animal now finds its way back to the British farmer.

"It is pointed out that in Denmark an Act was passed by the Legislature in 1922 making it incumbent on every farmer to take measures to exterminate warble fly larvae appearing in his herd. As a result the total percentage of hides with open holes for the entire year fell from 20.5 per cent in 1922 to 4.5 per cent in 1924. The very high percentage of animals infested annually in Canada should be regarded as a matter of national concern and warrants Dominion-wide efforts.

"Data on the percentage of grubby hides taken off this year will be obtained as soon as the grub season is over. Data already submitted for 1931 shows 76 to 80 per cent of grubby hides on some western stock for March and April."

(By Annette)

350 SIMPLE AND LOVELY— YOUTHFUL

Here is a blouse you'll love. It's not alone flattering and youthful but thoroughly wearable.

A dotted crepe silk made the original in white ground with shippier blue nickel sized dots. It's a combination that fits into many colour schemes. It's a type that may be worn with a suit or with a separate contrasting skirt or made as a complete frock worn with a matching skirt.

Net, eyelid batiste and lace are dainty suggestions.

Handkerchief linen, printed batiste, dotted swiss, pinstriped crepe silk and satin are ideally suited to this model.

Style No. 356 may be had in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust.

The 36-inch size requires 2 yards of 38-inch material.

Price of pattern 25 cents in stamps or coin order is preferred. Wrap coin carefully.

Writing To Take Charge

People are getting more air-minded every day, or maybe it's the unemployment situation. Fearing that no one would be on hand to leap from a balloon at the height of 1,500 feet, the Audubon Park Commission, New Orleans, advertised an offer of \$3 for every minute in the air. The advertisement was answered by 121 men.

Population Of Great Britain Largest Ever Recorded, But Birth Rate Is Much Lower

Praise For Livestock From Saskatchewan

If Quality Maintained Will Command Highest Prices On British Market

Excellent outlook for Saskatchewan's livestock exporting industry is seen in the tribute received by W. W. Valdon, markets commissioner of the province, from the Co-Operative Wholesale Society of Great Britain.

"If Canada continues to produce and ship to England this quality, she need have no doubts as to satisfactory prices; even on low value markets they would command the highest prices available," the letter received by the commissioner states.

Conjuncture is being voiced by Canadian cattle and livestock men as to the cause of the excellent run produced. Whether fortune entered the shipment and found Saskatchewan ready with a "good run" of stock or whether the available cheap feed has caused a liberality in feeding is a matter of concern.

A more strict interpretation by Saskatchewan livestock breeders of export cattle is looked upon by Commissioner Valdon as the likely cause for the general good quality shipped.

"The last shipment of cattle received per the S.S. Manchester Citizen was about the best ever received from Canada and has done more good in two days than a whole year of poster advertising or broadcasting could ever do, the quality being far superior to any Irish and equal to any Scotch," the letter relates. "The prices realized on the selected of this shipment were equal to our selected 'Norfolk cattle,'" it continued.

"Our markets will be favorable for another six weeks until the Irish grass fed cattle arrive, although even then our selected steers (young finished) will always be in good demand at top market prices," the letter concluded.

Farmers Must Fight Cutworms

Advised To Work Weed Patches and Leave Clean Land Alone

Cutworm losses in the areas affected this year will be heavier in 1932 unless exceptionally heavy rains occur. It is the prediction of the Dominion laboratories at Lethbridge. At the same time the entomologists prophesy that areas lightly affected this year will suffer greater losses next year.

The department suggests that farmers set the worms to work clearing out Canada thistle and other weed patches by working these lands between July 25 and September 7, when the cutworm eggs are laid. Clean land should not be touched between those dates, the authorities state as the worms work only in loose soils.

England has eight autogyps.

The highest population ever recorded for Great Britain—and the lowest birth rate in the last 50 years—are features of the preliminary report of the registrar-general, dealing particularly with England and Wales, following the census of April 26 last.

The population of Great Britain on census day was 44,790,485. The population of England and Wales 39,917,931, and of this figure there were 20,609,087 females to 19,138,844 males.

The total population rate .685 persons to the square mile—is higher than in any country recorded, with the probable exception of Belgium.

But the country now ranks lower than any other except Sweden in the birth rate. Births registered were 6,330,060, compared with 8,281,000 in the previous census.

"Despite the fact that the marriage rate has been well maintained, particularly at the younger ages at which the bulk of births occur," says the report, "and despite the further fact the exceptional post-war spurt in the birth rate itself had only just passed its maximum at the beginning of the decade, the total births registered are 1,250,000 fewer than in the preceding period, which covered the war years, when the birth rate sank to levels never before recorded."

"The full significance of the fall will be but dimly appreciated for many years. Any temporary satisfaction felt in the reduction of the number of unproductive mouths to be filled during the present period of economic stress must sooner or later be qualified by realization of the more profound secular issues involved."

As a partial set-off against the decline in births the deaths registered were more than 500,000 fewer than in either of the two preceding ten-year periods.

Trade Emporium In China

Novel Building To Be Opened In Shanghai This Year

One of the most novel modern buildings in China is to be opened in Shanghai this year. It is a trade emporium being erected by the Continental Bank of Shanghai, and occupies an entire block on Nanking Road. The building will be seven stories high, and will have four elevators in different parts. There also will be accommodations for a modern hotel, restaurants, offices and shops. To enable automobiles to reach any part of the building a "T" shaped lane will be constructed inside.

Works Both Ways

Illness Is Bad For Sale As Well As Insane People

Illness, says the physiologist, is bad for the insane. It is bad, too, we think for the sane. Hard work may in some measure reclaim the insane or at least help them to justify their existence. But enforced illness has a cruel trick of unwhinging minds that heeded too deeply on the cares of this world, and before we reclaim the maimed minds of our race we should see to it that those who are still whole shall be kept whole to the end.

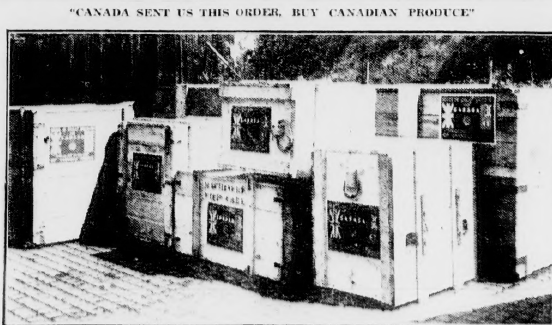

Marble buildings and statues of ancient Greece were not the white objects that they are sometimes thought to be, but were painted in bright, soft colours.

Siam is developing its automobile roads through the jungles.

"I dream of you day and night, Miss Mimi."

"Ah, that is why you are always so sleepy," Lustige Reueker Zeitung, Cologne.

This interesting picture, just received from England, shows the latest campaign designed by the hard-working Empire Marketing Board to boost the products of the Dominions and Colonies in the British Isles. The photograph shows a number of huge packing cases on one of the station platforms in England containing a consignment of British steel for Canada. On the sides and tops of these cases are nailed boldly labels bearing the words "Made in Great Britain for Canada." Under these words are the Union Jack and the Canadian Ensign in color and the words "Canada sent us this order, buy Canadian produce." This message is intended by the Empire Marketing Board to convey to all who may see it, whether at the workshops before departure, or in the course of the journey to the ports, that Canada is buying goods from the Motherland and that the people in the British Isles should reciprocate. The new scheme is meeting with an encouraging response.

"How strangely they play."

"Yes. They are exhibition dancers, and they practice while they play tennis," Der Brummer, Berlin.

New Kind of Forage Grass for Prairies.

Will Have Far-reaching Effect On Canadian Agriculture.

The prairies are to have a new forage grass, the crested wheat grass which may have as far-reaching an effect on the West as the development of new types of wheat has had. It is the result of years of breeding of various strains of grasses to provide a variety which will be better than any other for fodder purposes. Professor L. E. Kirk, formerly of the University of Saskatchewan and now Dominion Agronomist, has been responsible for developing this grass.

After years of trials and experiments this grass was put through seven tests this summer and those were so successful that it may well play a big part in livestock raising in western Canada.

In making the announcement, Hon. Robt. Weir, Minister of Agriculture referred to the advantages this grass has over other in use in the prairies. It is more palatable than any of the other grasses. It is high in feed values and comes earlier in the spring than any other grass in the west, in fact being green under the snow.

In the test this summer, crested wheat grass was cut nine times and still remained green and full of sap. Its roots are twice as deep as rye grass and side by side with rye grass in a field this summer, it was firmly rooted whereas rye grass was easily kicked out.

Another variety of forage which Prof. Kirk was responsible for some years ago was Grimm alfalfa and later the alfalfa which received its name because in its appearance it is a cross between alfalfa and sweet clover.

Of course there will not be enough seed from the crested wheat grass available for the coming seeding period and the minister has a committee of three seed experts in the United States now arranging to secure quantities of western rye grass seed and grazer rye grass seed to develop pasture lands on the prairies.

Navy League Head Thanks Didsbury

Fred Cooke, provincial representative of the Navy League of Canada, who has been in Didsbury on his annual visit collecting subscriptions for the Navy League, thanks the citizens of Didsbury for their loyal support, as the sum of \$18.91 has been given through the Alberta division.

The Navy League of Canada assists the widows and orphans of the men of the Mercantile Marine and also supports the Sailors' Homes and Institutes, etc. in all the large Canadian ports from coast to coast and looks after the welfare of the seamen when ashore. In addition to this, the League trains young men and boys, helping to make better Canadian citizens of them.

May Find New Use for Surplus Grain

New uses for surpluses of wheat and other grains are being made the subject of an exhaustive survey by the National Research Council of Canada.

Two researches initiated are already yielding interesting results. One of these is a study of the refuse screenings, largely weed seeds, which accumulate at the grain elevators at the head of the Great Lakes to the extent of more than 50,000 tons a year. At present these screenings, if marketable at all, fetch almost nothing. The research is already indicating that they could be made to yield products—oil for soap making, fertilizer and possibly feed—which would make them distinctly valuable.

In the other research a beginning has been made on the problem of finding methods of utilizing straw. The total amount of straw grown in Canada each year aggregates about 50,000,000 tons, most of which is wasted.

A careful study of the possibilities of using surplus grain for the manu-

Record Time Across Two Oceans

Around half the world in 17 days, London to Yokohama by way of Canada and Honolulu is the record of Miss D. Bewley, of London, en route to join her uncle Allan Cameron, Oriental manager of the Canadian Pacific, Hong Kong, who left Vancouver July 18 on the Canadian Pacific liner Empress of Canada. Miss Bewley, in company with Lady Lindley, wife of Sir Francis Lindley, British ambassador in Japan, and other through passengers, left Southampton July 6 and arrived in

Quebec July 13 on the new Empress of Britain, was rushed to Montreal by boat train where she boarded the Imperial Limited for Vancouver. Reaching Vancouver July 18 at 8.15 she boarded the Empress of Canada, thus obtaining direct connection to the Orient. A combination of the Empress of Britain's fast time across the Atlantic and the Empress of Canada's fast time over the Pacific makes this the fastest trip on record between London and the Orient by way of Canada and Honolulu.

Keeping Up Milk During the Summer

In the late spring and early summer the dairy herd usually reaches its maximum production for the year. This is due to the abundance of grass with comfortable surroundings, moderate temperature and reasonable exercise.

The latter part of July and August is the season of the year when it is difficult to keep up the milk flow. Pastures are usually dry, flies are bad, and the heat is oppressive. The cow that drops off in her milk flow at this time is not likely to come back to normal flow even with the best of food later in the season. It is therefore very important to provide plenty of feed at this time for all cows in milk if a profitable yield is to be maintained.

Bare pastures should be supplemented and it is here that surplus silage, soiling crops, such as alfalfa, sweet clover, oats and corn and annual pasture crops can be used to greatest advantage.

At the Dominion Experimental Station, Lacombe, the dairy cows are usually turned out on bromo or sweet clover pasture about June 1. When this pasture becomes short the cows are turned into an annual catch crop pasture grown from seeding a combination of two bushels of oats and one bushel of winter rye per acre. The oats provide the pasture during late July or early August and the winter rye provides the fall pasture.

THIS week, test the outstanding value contained in every General Motors car. At your convenience, a car of the size, price and body type you prefer will be brought to your door, by your General Motors dealer, for you to drive and inspect. Remember, General Motors issues with every car, a generous Owner Service Policy which states the exact service to which an owner is entitled—and which holds good at any of the thousands of General Motors dealers throughout North America. Call your dealer today. You will find him listed under "General Motors Cars" in the classified pages of your phone book. If you wish, you may buy economically on time payment through GMAC.

WORLD HAPPENINGS BRIEFLY TOLD

Displays of 260 firms were shown in the advertising and packing section of this year's fair at Leipzig, Germany.

The London Daily Herald says that Amy Johnson, British aviator who made a solo flight to Australia, is now preparing for a trip across Europe and Asia to Tokyo.

Feminist leaders of the world, after a two-days' meeting, agreed on a report to assembly of the League of Nations demanding complete equality for men and women in the matter of nationality.

Mrs. C. M. Strong, affectionately known to thousands of Canadian troops overseas during the Great War, as "mother" of the 44th Battalion, died at her home in Winnipeg recently.

His first visit to civilization was too much for Otto Knudsen, Eskimo hunter of the Laugel Knudsen Arctic Expedition, who became violently demented when he saw his first movie at Thorshavn, Faror Island.

Among scientists who have been awarded long-term grants for medical research by the trustees of the Banting Research Foundation, is Samuel Weinstein, University of Saskatchewan.

From his colleagues in the cabinet, Mr. Hon. R. B. Bennett, prime minister, was the recipient of a beautiful set of antique silver entrée dishes. The gift was in recognition of his list industry.

In front of the Australian Commonwealth building at Canberra will be shortly erected a 290 foot flag pole of Douglas fir, the gift of the province of British Columbia to the Australian people.

Excellent progress is being made in driving the herd of Alaskan reindeer to its new quarters in the Mackenzie River district, Hon. T. G. Murphy, Minister of the Interior, told the House of Commons recently. Latest reports said the herd was about 260 miles from its destination.

Vancouver Wheat Shipments

Wheat exported from Vancouver for the current crop year will exceed 70,000,000 bushels, according to estimates of the Vancouver Merchants' Exchange. For the present crop year to June 11, a total of 65,872,425 bushels were moved, compared with 43,937,181 bushels for the corresponding period a year ago.

Teacher—Hollo, what is jam?
Hollo—Jam is what causes bread to taste and so nice when there's none on it.

"In conclusion, I would plead as an extenuating circumstance the absolute innocence of the accused!"—Bondagee—Sir, Stockholm.

W. N. L. 1898

Canard Week-End Cruises

Something New in the Line of Ocean Travel

A pioneer steamship company for the past 91 years, the Canard Line came to the front this year with something new in the line of ocean travel; the week-end cruise, a voyage which gives practically everyone who can afford even a short vacation a chance to go to sea and visit a foreign port.

Already thousands have visited Nassau, down near the Tropic of Cancer, more than 900 miles south of New York, and the Islands of Bermuda, 600 miles off the coast of Savannah, and they made the round trip in four days. The better part of a day was spent ashore in sight-seeing, golfing or sun bathing.

The schedule for the summer season calls for week-end cruises to Nova Scotia, with sufficient time to visit the many historic points in the environs of Halifax, the birthplace of Samuel Canard, founder of the line which bears his name.

The Canard's week-end cruises are made by the line's express steamers, the "Berenaria," "Aquitania" and "Mauretania," among the largest and finest ships in the world.

These lines steam through the sea at a leisurely pace of 16 to 20 knots, so that the voyager may get the full good of the bracing air and the health-giving sunshine.

To the question, "What is done on these week-end cruises?" the answer might properly be, "Everything." People play the regular deck games and invent new ones of their own; they bet on the days run of the ship, as well as upon the horseshoe on deck; they bathe in the indoor pool or in the huge tank on deck; they dry their selves by lying prone on the hatch tops or take sun baths in deck chairs; they talk about in bathing and various kinds of sports suits, the girls displaying many types of wide-legged pajamas, in short, they do very much as they please, and they offend no one by doing so. Also there are lectures, photo plays, dances and night clubs.

Good food plays a large part in the pleasure of the day, and the catering superintendent of the line goes along to make sure that there is no economy practiced on the bill of fare; that dishes are added rather than cut out.

The entire ship is first class for these week-end cruises. There is no second or third class anywhere. Passengers are permitted to use all the public rooms and every deck from stem to stern.

These trips make a strong appeal to vacationists who go away for two or three weeks every summer. They give such people a chance to begin or close the vacation period with a sea trip and yet leave enough time for a week or two in the mountains as usual.

An interesting sight is the ceremony of dropping the pilot after passing through Ambrose Channel. This is an incident which lines the rail with observers. The pilot always leaves in a small rowboat, being picked up a hundred or two hundred yards away by the yacht-like steam tender. Soon after passing here all land fades out of sight. The next delight of this kind is catching the first sight of the land to which the ship is steaming. This always reminds the passengers of the thrill which came to Columbus when the first land loomed up in the West Indies.

Returning from a cruise, a great crowd moves to the rail to note the arrival of the Sandy Hook pilot in his little rowboat, looking like a chip alongside the huge liner. At quarantine, off the eastern shore of Staten Island in New York Bay, the port doctor comes aboard, and when he clears the ship the customs and immigration men board the steamer from a coast guard cutter and check up on every passenger on the ship, leaving no loop-hole for the stowaway.

This ceremony over, the ship proceeds to her pier, where many friends await the arrival of the tourists. Once on the pier, the baggage is quickly passed and the passengers go home to tell their friends about this new idea in ocean voyaging and to urge them to book at once for a week-end tour on the wide Atlantic.

Union Diet For Sheep

Sheep flocks on Colorado's western slope have been put on an onion diet to reduce last year's surplus. F. D. Warren, warehouse owner, said hundreds of sacks of onions have been given sheep owners, as there has been no market for them.

Buried Treasure

Party of Vancouver Men Will Sail To Cocos Island in Search of Hidden Wealth

Lured by legendary tales of fabulous treasure buried by pirates of olden days, a party of Vancouver men, headed by Col. J. E. Leckie, will sail for Cocos Island, 600 miles off the coast of Costa Rica.

It is popularly supposed that more than 300 tons of treasure, valued at \$600,000,000, is hidden on Cocos Island, buried there by Thompson, Davis and other famous pirates of early days. Wealthy citizens of Peru are also said to have hidden their gold and jewels there during the revolution of 1882.

Three other British Columbia expeditions have searched for treasure on Cocos Island, one in 1892, on the Eliza Edwards, under command of Capt. P. S. Macdonald; another in 1905, from Victoria, and a third in 1924.

Sir Malcolm Campbell, world's auto speed record holder, announced recently that he will make another visit to Cocos Island this summer. He is reported to be outfitting an expedition in England now.

Col. Leckie's party will sail direct to Costa Rica, where eight Costa Rican soldiers and an officer to guard the interests of the state will join the expedition. Cocos Island is owned by Costa Rica and the state will claim one-third of whatever treasure is found.

Sponsor Withdraws Bill

Proposed Amendment Dealing With N.S.F. Cheques Is Dropped

On the suggestion of Hon. Hugh Guthrie, minister of justice, the bill of A. W. Neill (Ind., Comox-Alberni), dealing with cheques issued without funds was dropped by its sponsor in the House of Commons. In brief the proposed amendment provided that if cheques issued with no funds or insufficient funds in the bank were not honored within a reasonable time the issuer would be liable for the first offence to a fine not exceeding \$100 or three months' imprisonment, and to \$200 fine or six months' imprisonment for a subsequent offence.

Certain amendments would be introduced this session to the criminal code, Mr. Guthrie stated, and consideration would be given to the bill that Mr. Neill really had in mind. "The view I take," the minister of justice stated in speaking of the measure, "is that the proposed amendment would open the door to issuers of worthless cheques." Under the bill the issuer would not be liable unless he failed within a reasonable time to pay the amount.

New Senators Appointed

Patrick Burns, Of Calgary, Alberta, Named a Member Of Upper Chamber

Patrick Burns, of Calgary, Alberta, well-known cattle man, has been appointed to the senate. Arthur MacCotte, K.C., Pontiac, Sask., has also been named a member of the Upper Chamber. Official announcement to this effect was made recently.

The new appointee from Alberta will succeed the late Senator P. E. Lescaud, Edmonton, who died in April last. Saskatchewan's new senator will fill the vacancy caused by the death of Hon. J. G. Turfitt last fall.

The party standing in the senate will now be: Conservatives, 47; Liberals, 48.

One more vacancy exists in the Upper Chamber at present due to the death, slightly more than two months ago, of Senator G. G. Foster, Montreal. When this vacancy is filled, Conservatives and Liberals will have equal representation.

Introduced Amendment To Companies' Act

Bill Aims To Aid Employees In Purchasing Homes

Amending the Companies Act so as to enable a company to make loans to its employees for the purpose of purchasing or building their own homes, even when such employees are shareholders of the company, Hon. C. H. Cahan, secretary of state, introduced a bill into the House of Commons. The bill received first reading.

The amending bill also permits the auditor of a company to be a director, when such company's bonds and shares are not offered for public subscription.

Goods Had Vanished

Ice-Melted While Customs Officials Debated on Classification

It is only within the last century, says the Manchester Guardian, that we have learned to temper summer heat when we get it—with ice drinks. The first cargo of summer ice brought to this country was shipped from Norway, and it arrived in the Thames in June, 1822. The customs officials had to deliberate long and earnestly as to the heading under which it should be classified for duty. When at length they decided to list it as "dry goods" the entire cargo of 300 tons was found to have melted.

Standing on a concrete floor while using an electric iron is dangerous, for a shock may be transmitted if the concrete is damp.

Research Grants

Westerners Receive Aid Under Banting Research Foundation

Among the scientists who have been awarded long-term grants for medical research, by the trustees of the Banting Research Foundation, is Samuel Weinstein, University of Saskatchewan.

Prof. F. D. White, P. G. Mar, and Dr. R. H. Fraser, all of University of Manitoba, were awarded short-term grants.

Professor White is the assistant professor of bio-chemistry at the Medical College, Peter Mar has completed his second year in medicine, and Dr. Fraser is the lecturer in physiology and pharmacology. The research work which is being done by them covers the present summer only, and was begun shortly after the closing of the winter term at the medical college. Peter Mar is a graduate in science of the university, and has this qualification for research work.

Keeps Editors In Order

Unique Gavel Used By President At C.W.N.A. Convention

One of the most important items in evidence at the Canadian Weekly Newspapers' Association Convention in Regina, Saskatchewan, is the gavel used by President Malcolm Macbeth to keep the editors in order. It is made from the wood of old Fort Malden, vintage about 1800 A.D., and is reminiscent of General Isaac Brock and Tecumseh, the famous Indian chief.

This gavel was presented to the association in 1926 by the Lake Erie and St. Clair Fishermen's Association. At that time Hugh Savage, of Truro, B.C., was president of the association, so the gavel was handed to him with the words, "From one savage to another."

The gavel is suitably decorated with a silver plate setting forth its antiquity and usages.

War Hero Dies In Theatre

General Bertrand, national hero for his spirited defence of Liege and for the Yser campaign during the Great War, dropped dead in his seat at Brussels. He was credited with delaying the Germans for ten days at Liege whilst Marshal Joffre reformed the French army for the defence of Paris.

There Is No Good Reason Why Alberta Wheat Pool Members Should Not Deliver All Their Grain To

Alberta Pool Elevators

UNDER THE SYSTEM NOW IN EFFECT, ALBERTA WHEAT POOL WILL GIVE MEMBERS THE OPTION:

- (1) Of delivering their wheat on a pool basis, accepting the prevailing initial payment and participating in any future payments which may accrue from the pooling thereof.
- (2) Of disposing of their wheat under any of the methods provided by the Canada Grain Act and obtaining full current market price for the same.

Any portion of a member's wheat may be pooled, or any portion sold outright for cash.

COARSE GRAINS will be handled by Pool Elevators on a commercial basis only, full cash payment being made as during the past year.

Your patronage of Pool Elevators will preserve for Alberta grain producers a grower-controlled, co-operative elevator system that has abundantly proven its value.

Mountain View Notes

Mr. and Mrs. Owen, of Calgary are spending a few days in the district.

Mr. and Mrs. Rosenbent and son Charles were visitors at the B. A. Atkinson home Sunday.

Friends of Mr. Garret Tighe are pleased to hear he is out of the hospital and home again. All wish him a speedy recovery.

A couple of residents went in search of Saskatoons and were successful in obtaining thirteen quarts. The berries were much earlier this year.

Housewives are being annoyed by the common house flies which enter their residences by the score. Flycatchers are very saleable articles at present.

Carman is not only a thing of beauty, but a profitable bush, as this year the government is offering 60 cents a pound for the seed. Some have already sown seed which may bring them more than wheat.

Quite a large number of the members of the W.L. attended the conference held recently at Carstairs. Mrs. Montgomery, the provincial president gave a very interesting address on the gathering. Mrs. Hoosegood was re-elected constituency convener.

Burnside Notes

Mr. Bill Jenkins arrived home Saturday for a month's holiday.

Mr. and Mrs. Jack Elliott, Bill Bruce and Lewis Metuloh were Sunday visitors at Sam Elliott's.

Mr. and Mrs. Noah Eckel and Robert were visitors at Mr. Duncan Morrison's, near Okla one day last week.

Mr. Ralph Long who is spending a few weeks holiday in the district, was a weekend visitor at Mr. Noah Eckel's.

Mr. and Mrs. Jas. Groundwater their daughter May and sons Alastair and Douglas were Sunday visitors with Mr. and Mrs. A. E. Thompson.

Miss Isabel Mackie, Claude Mackie and Mr. Shearer, principal of Arrowwood School were weekend visitors with Mr. and Mrs. Joe Clark.

Mr. H. A. Pearson, Mrs. Wm. McCulloch and son Lewis spent Thursday at Carstairs visiting Mr. Walter Edmondson who is slowly recovering from his very severe burns.

Community Club picnic has been postponed from August 14 to Wednesday, August 19th on account of the old timers picnic to be held at Klover Lake August 14th.

Melvin Notes.

Mr. and Mrs. T. Duncan spent Sunday at the Geo. Youngs home.

Mr. and Mrs. Emil Krebs were dinner guests of Mr. and Mrs. Otto Krebs Sunday.

Go-Getters played Westcott on Friday at Westcott, the latter winning 7-11.

Mr. O'Brien, Florence, and Mrs. Geo. Youngs were Calgary visitors Friday last.

Rosebud and Go-Getters played softball Sunday, the former winning by 7-11.

Mr. and Mrs. Whiteside and Douglas returned last week from a two weeks holiday in Saskatchewan.

Transportation under the terms of the new Canadian Regulations, that the King and Queen of the United Kingdom will be accompanied by the Duke of York and the Duchess of York, will be the first time since the death of the late Queen Victoria that the British monarch will be accompanied by a consort. The Duke of York, then, will be the first consort to accompany the British monarch since the death of the late Queen Victoria.

BERGEN—NICHE VALLEY

Bob Stevens is planning lumber for Dan Russell at present.

There are good prospects here for an abundant harvest of greenfeed, hay and grain.

Mr. John Davidson, head north of Bowden, has bought the old McInnes place at Bergen.

Tru Garbille attended the Saginaw Camp Meeting held at Red Deer recently.

Rev. Roberts, of Three Hills held a service in Edsvald school Sunday afternoon August 2nd. There was an attendance of fifty.

Harvey Burgess, an old resident of Didsbury will teach Bergen School this coming year. Miss Irene McConnell, of Calgary will teach the Edsvald school.

Orwell Geiger spent a portion of his honeymoon at Edsvald and a charivari was given in his honor, in which many of his friends and former people participated. He will teach at Crescent Heights, Calgary again this year.

Registration of Threshing Machines.

(Sec. 2, Chap. 183, R.S.A. 1922)

Every person, firm or company owning or operating a threshing machine or separator (including combined, or combination machines) shall, each year before commencing operations, register machine or machines, with the Minister of Agriculture and shall procure a certificate of registration. Registration fee: One dollar for each machine.

Apply: H. A. CRAIG, Deputy Minister of Agriculture, Edmonton, Alberta.

NOTICE TO CREDITORS AND CLAIMANTS

In the Estate of GEORGE HENRY SAUNDERS late of the Town of Didsbury, Alberta, Farmer, deceased.

Notice is hereby given that all persons having claims on the estate of the said George Henry Saunders who died on the 22nd day of March, 1931 are required to file with the undersigned Administrator of his Estate by the 30th day of September, 1931, a full statement duly verified of their claims and any securities held by them and that after that date the Administrator will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or brought to his knowledge.

Dated this 30th day of July, 1931.
